Summary

Computer Science student with hands-on experience in containerization, CI/CD pipelines, cloud deployments, and backend systems. Proven ability to build and ship real-world solutions through internships, open-source projects, and hackathon wins. Actively seeking a DevOps / Cloud Engineer role to deepen infrastructure and cloud expertise.

Education

Egerton University, Njoro Campus — Nakuru, Kenya
Bachelor of Science in Computer Science — *Expected Aug. 2027*

Experience

Backend Developer Intern — December 2025 – Present
Syni.ai — *Remote / Nakuru, Kenya*

- Developed and maintained RESTful APIs using FastAPI, supporting production backend services
- Contributed to DevOps deployment workflows including containerization and service integration
- Optimized database queries and improved API response performance
- Participated in code reviews and collaborated with cross-functional engineering teams

DevOps Lead — 2024 – Present
EUCOSSA (Egerton University Computer Science Students Association) — *Nakuru, Kenya*

- Designed and maintained CI/CD pipelines using GitHub Actions for club and student projects
- Containerized and deployed applications using Docker, ensuring consistent environments across dev and production
- Led infrastructure planning and deployment for university technology solutions
- Mentored fellow students on DevOps practices, backend systems, and deployment workflows

Hackathon Participant / Winner — 2024 – 2025
Various Institutions — *Kenya*

- Winner – Interuniversity Hackathon 2025 (Cybersecurity Theme), 3rd Overall
- Winner – JHUB AI Summit Hackathon
- Engineered solutions across AI, cybersecurity, and fintech domains under time-constrained conditions

Projects

FleetFlow | *Spring Boot, Docker, PostgreSQL, GitHub Actions* — 2025 – Present

- Built a fleet management system for Egerton University's Transport Department as a real-world client project
- Containerized the full stack using Docker and Docker Compose for consistent local and production environments
- Configured GitHub Actions CI/CD pipeline with parallel lint, test, and gated build steps
- Managed PostgreSQL database design, migrations, and query optimization

IntelliSecure | *Django, Flutter, AI, Docker* — 2024 – Present

- Developed an AI-powered SMS fraud detection system targeting fintech security
- Containerized backend services with Docker for portable and reproducible deployments
- Designed Django backend and integrated Flutter mobile interface with model-driven alert workflows

NeuralBridge | *Django, React, WebSockets, AI Models* — 2024 – Present

- Built a real-time communication bridge for deaf and autistic users using TTS, STT, gesture recognition, and emotion detection
- Integrated AI models into a WebSocket system for low-latency, real-time inference
- Developed a React frontend optimized for accessibility and live updates

Technical Skills

DevOps & Cloud: Docker, Docker Compose, GitHub Actions (CI/CD), Linux, Git
Languages: Python, JavaScript, SQL, Java
Frameworks: Django, Django REST Framework, FastAPI, React, Spring Boot
Databases: PostgreSQL, MySQL
APIs: REST API design, development, integration, and testing
AI/ML: AI model integration, model deployment, LLM engineering (Udemy – In Progress)
Tools: VS Code, Postman, WebSockets, Kali Linux

Certifications & Awards

Interuniversity Hackathon 2025 – Winner (Cybersecurity Theme), 3rd Overall
JHUB AI Summit Hackathon – Winner
ICP Hackathon – Participant
LLM Engineering (Udemy) – In Progress
